

---

**CHECKLIST #0225 FOR THE APPROVAL OF:  
GLASS BLOCKS (MASONRY)**

---

- ☐ Basic Requirements Checklist.
- ☐ One set of the manufacturer's 'approval document' including:
  - a. Details of glass block,
  - b. Details of horizontal and vertical reinforcement, and
  - c. Anchoring method of perimeter for all configurations.
- ☐ Calculations verifying tested anchoring method of perimeter channel to the structure using trapezoidal wind load distribution for all possible width and height configurations.
- ☐ One set of manufacturer's design drawings marked and verified by the testing laboratory.

**The following current laboratory tests and test reports in compliance with protocol TAS 301.**

- ☐ Uniform static air test per TAS 202-94. (Report wall alignment. See Note 2.)
- ☐ Impact test per TAS 201-94. (Report penetration, rupture & block separation. See Note 2.)
- ☐ Cyclic test per TAS 203-94. (Report wall alignment. See Note 2.)

Notes:

1. Each design pressure rating requires a new set of tests per protocols.
2. This reporting is required on tests TAS201, TAS202 & TAS203 in addition to that mentioned in the respective protocols.
3. TAS201 & TAS203 are not applicable if glass block is to be protected by an impact resistant device.
